How to use this template

1. Print every page at 100% and check the scale bar at the bottom.
2. Cut out the paper pieces, including the window and door openings.
3. Roll the dough 0.6 cm thick directly on baking paper. Lay the templates on top and cut around them with a sharp knife.
4. Chill the cut pieces for 15 minutes so they hold their shape, then bake.
5. While the pieces are still warm, lay the templates on them again and trim any edges that spread.
6. Let everything cool flat and dry overnight. Build with thick royal icing and let the walls set for an hour before adding the roof.
